

# Key Terms for Tarot

By Sal Jade

**Spreads:** The way the cards are spread out – the formation which they are spread: examples include: Celtic Cross, the horseshoe spread, the 3 card spread etc

**Position of Cards:** This is the cards are within the spread- their position- for example in the past position or the near future position

- **Tune in:** Like tuning into a radio- when a psychic tunes in to you- they are scanning your energy field to receive information from Spirit & your guides and angels.  
**A hit:** is a message
- **Channelling:** is communicating with any being that is not currently in human form- like angels & guides
- **Karma-** many different interpretations- in basic terms it means what you put out you will get back- whether good or bad-The Law of Cause and Effect, however the deeper meanings is linked to the lessons you are meant to learn in the lifetime- and learning how to balance and heal your karma- and heal karmic debt between you and others that may have accumulated in other lives.
- **Master Lessons:** The lessons you are here on earth to learn in this lifetime- such as compassion, forgiveness, abundance, releasing attachment etc.

## The God Word

Please Use whatever feels comfortable for you- some people have negative associations with God- perhaps from organised religion- I suggest using what you feel comfortable with- and if I say God or Creator- feel free to substitute it with whichever works for you

## Universe Source Spirit Creator, God

**Psychic Protection:** This is the act of protecting yourself from dark entities or psychic attack using visualisation, prayer, crystals or other methods. This is important to be done every day- but extra important when doing readings for yourself and others so you don't pick up any negative energy or dark entities.

**Ethics:** Who you should be reading for- who you should avoid for your best and highest good and the best and highest good of all. .
